

Components of Population Change, Selected Texas MSAs, April 1, 2000-July 1, 2006

(Percentage of total change)

(Number of persons)

Austin - Austin-Round Rock, TX Metropolitan Statistical Area (MSA)

Dallas - Dallas-Plano-Irving, TX Metropolitan Division (MD)

Fort Worth - Fort Worth-Arlington MD

Houston - Houston-Sugar Land-Baytown, TX MSA

San Antonio - San Antonio MSA

Notes:

The data shown in this table are based on the REVISED definitions of Metropolitan Divisions and Metropolitan Statistical Areas as defined by the Office of Management and Budget in 2003. For a list of the component counties in metropolitan areas, go to "Component Counties of Texas Metropolitan Areas..." in the Texas Cybercities section of the Austin Index (<http://www.ic2.utexas.edu/bbr/texas-cybercities/texas-cybercities.html>)

Net migration - net internal migration plus net international migration.

Net Internal Migration is the difference between internal in-migration to an area and internal out-migration from the same area during a time period. Internal in- and out-migration consist of moves where both the origin and the destination are within the United States (excluding Puerto Rico).

Net International Migration is defined as any movement across U.S. borders. The U.S. Census Bureau makes estimates of net international migration for the nation, states, and counties. Net international migration is: (1) net migration of the foreign born, (2) net movement from Puerto Rico, (3) net movement of the U.S. Armed Forces, and (4) emigration of the native born. The largest component, net migration of the foreign born, includes lawful permanent residents (immigrants), temporary migrants (such as students), humanitarian migrants (such as refugees), and people illegally present in the United States.
