

**Components of Population Change for Selected Texas Metropolitan Areas
April 1, 2000, to July 1, 2006**

(Change is derived from the April 1, 2000 estimates base.)

Metropolitan area	Population		Total population change	Natural increase			Net migration		
	July 1, 2006	April 1, 2000	Number	Total	Births	Deaths	Total	Net international migration	Net internal migration
Austin	1,516,748	1,249,753	266,995	101,154	143,196	42,042	165,841	58,194	107,647
Dallas	4,027,343	3,451,248	576,095	283,249	413,696	130,447	292,846	221,876	70,970
Fort Worth	1,990,353	1,710,270	280,083	118,277	193,157	74,880	161,806	64,295	97,511
Houston	5,481,695	4,715,407	766,288	360,770	548,318	187,548	405,518	259,428	146,090
San Antonio	1,947,738	1,711,726	236,012	102,488	184,367	81,879	133,524	29,250	104,274

Austin - Austin-Round Rock, TX Metropolitan Statistical Area (MSA)
 Dallas - Dallas-Plano-Irving, TX Metropolitan Division (MD)
 Fort Worth - Fort Worth-Arlington MD
 Houston - Houston-Sugar Land-Baytown, TX MSA
 San Antonio - San Antonio MSA

Notes:

The data shown in this table are based on the REVISED definitions of Metropolitan Divisions and Metropolitan Statistical Areas as defined by the Office of Management and Budget in 2003. For a list of the component counties in metropolitan areas, go to "Component Counties of Texas Metropolitan Areas..." in the Texas Cybercities section of the Austin Index (<http://www.ic2.utexas.edu/bbr/texas-cybercities/texas-cybercities.html>)

Net International Migration is defined as any movement across U.S. borders. The U.S. Census Bureau makes estimates of net international migration for the nation, states, and counties. Net international migration is: (1) net migration of the foreign born, (2) net movement from Puerto Rico, (3) net movement of the U.S. Armed Forces, and (4) emigration of the native born. The largest component, net migration of the foreign born, includes lawful permanent residents (immigrants), temporary migrants (such as students), humanitarian migrants (such as refugees), and people illegally present in the United States.

Net Internal Migration is the difference between internal in-migration to an area and internal out-migration from the same area during a time period. Internal in- and out-migration consist of moves where both the origin and the destination are within the United States (excluding Puerto Rico).

Net migration - net internal migration plus net international migration. The net migration rate expresses net migration during a time period as a percentage of an area's population at the midpoint of the time period.
