San Antonio - San Antonio MSA

***Notes:**

The population estimates shown in this table are based on the REVISED definitions of Metropolitan Divisions and Metropolitan Statistical Areas as defined by the Office of Management and Budget in 2003. The population figures in this table are not comparable to estimates published previously in the Austin Index. For a definition of the MSAs, click on "Component Counties in Texas Metropolitan Statistical Areas" in the Texas Cybercities section of the Austin Index.

The April 1, 2000 estimates base reflects changes to the Census 2000 population resulting from legal boundary updates as of January 1 of the estimates year, other geographic program changes, and Count Question Resolution actions. All geographic boundaries for the July 1, 2006 population estimates series are defined as of January 1, 2006.

The estimates in this table are for July 1 of each year. This table does not include population figures from the April 1, 1990, or April 1, 2000, Census of Population.

The estimates by the Bureau of the Census for 1990-1999 have been developed by applying a mathematical formula to take into account differences between the postcensal time series population estimates for the 1990s and Census 2000 results.
